Catalog description:

This course covers fundamental principles and applications underlying computer graphics and computer games. The course presents key aspects of computer graphics including graphics pipeline, scene graphs, 2D/3D geometric objects and transformations, viewing, shading, and modeling. Topics related to computer game development include game engines, animation, and behavior and interaction. The course will also introduce basic concepts of collision detection, illumination, game design and implementation, and will emphasize the application of the topics in game-related computer graphics programming projects with the use of graphics libraries and game engines and toolkits. Three lecture hours and three hours of scheduled laboratory time per week, plus programming work outside of class.

Prerequisites: MAT 108 or MAT 110 or any MAT course numbered 208 or above, plus CSC 260.

Goals:

The purpose of this course is to develop students' understanding of modern computer graphics and game development. The goals of this course are:

- CG01: to develop an appreciation for the modern computer graphics and game design;
- CG02: to understand the basic mathematics behind computer graphics;
- CG03: to understand the fundamental concepts in creating graphical contents;
- CG04: to present the design issues for game development;
- CG05: to give students experience in the construction of visual elements and environment (including games).

Objectives:

Upon successful completion of the course, a student will have:

- CO01: demonstrated knowledge of the mathematical foundations of computer graphics;
- CO02: demonstrated knowledge of the rendering pipeline in computer graphics;
- CO03: described scene graphs, 2D/3D transformations, 2D/3D viewing, lighting, and clipping;
- CO04: utilized at least one graphics library and at least one programming language to construct 2D/3D graphical objects and apply transformations, material properties, illuminations, and camera models to the objects to create a graphical environment;
- CO05: identified texturing, shading, curves and surfaces, rasterization, and z-buffer;
- CO06: become acquainted with basic game programming theory and tools, game engine, game GUI and input devices, collision detection;
- CO07: demonstrated the ability to design and develop an interactive game with the application of computer graphics techniques.

Program Objective vs. Course Objective matrix

Program Objective (condensed form)	CO01	CO02	CO03	CO04	CO05	CO06	CO07
PO-A: apply knowledge of computing and math	✓	✓	✓	✓	✓	✓	✓
PO-B: analyze a problem and define its computing requirements				✓			✓
PO-C: design, implement and evaluate applications							✓
PO-D: function effectively in teams to accomplish a common goal							✓
PO-E: professional, ethical, and social responsibilities							
PO-F: communicate effectively with a range of audiences							
PO-G: local and global impact of computing on people and society							
PO-H: need for continuing professional development							✓
PO-I: use current techniques, skills, and tools		✓	✓	✓	✓	✓	✓
PO-J: apply theory and principles to model and design systems						✓	✓
PO-K: apply design and development principles in constructing software							✓

Topics:

- Introduction
 - graphics system (hardware and software)
 - graphics pipeline
 - rasterization
 - scene graph
 - graphics libraries and APIs
 - computer graphics programming
 - GPU
 - interactive graphics
 - mathematical fundamentals of computer graphics
- Geometric objects and transformations
 - scalars, points, vectors
 - graphics primitives
 - coordinate systems and frames
 - representations and N-tuples
 - homogeneous coordinates
 - transformations
 - affine transformations
 - translation
 - rotation
 - scaling
 - shear
 - transformations in homogeneous coordinates
 - modeling shapes with polygonal meshes
 - concatenation of transformations
- Viewing
 - positioning of the camera
 - projections
 - orthogonal projections

GV1(5), GV2(2)

GV1(5), GV4(2)

GV1(3)

- perspective projections
- clipping
- z-buffer
- Lighting and texturing GV1(1), GV5(4)
 - light and matter
 - light sources
 - color sources
 - ambient light
 - point sources
 - spotlights
 - distant light sources
 - Phong reflection model
 - ambient reflection
 - diffuse reflection
 - specular reflection
 - use of Phong model in graphics API
 - translation
 - texture mapping
- Interactive graphics and games GV2(3), GV3(1), GV8(3), HCI2(2), HCI5(1.5), HCI7(1.5), IS2(1.5), SE2(2)
 - input and interaction
 - input devices
 - event-driven programming
 - picking
 - design of interactive programs
 - fundamentals of game design
 - design components and processes
 - user interfaces
 -
 - genres of games
 - game development
 - collision detection
 - artificial intelligence in games
 - game engine patterns

Assignments: Five to eight homework assignments will be given to help understand computer graphics and games topics and their related mathematical basics. Six to eight programming projects will be given to reinforce the concepts and techniques covered in the class. Lab exercises are preparations to and part of the programming assignments.

Quizzes, Tests and Examinations: there will be two examinations: a midterm exam administered in the middle of the semester and a comprehensive final exam administered during the final exam period.

Grading: The course grade will be determined using the following approximate weights: homework, 20%; programming assignments, 55%; midterm and final exams, 25%. There will penalties for late submissions of homework and programming assignments.

Assessment Mechanism / Course Objective matrix

	Exam Questions	Homework Problems	Programming Projects (individual and group)	Lab Exercises
CO01	✓	✓	✓	✓
CO02	✓	✓	✓	✓
CO03	✓	✓	✓	✓

Assessment Mechanism / Course Objective matrix

	Exam Questions	Homework Problems	Programming Projects (individual and group)	Lab Exercises
CO04	✓	✓	✓	✓
CO05	✓	✓	✓	✓
CO06	✓	✓	✓	✓
CO07		✓	✓	✓

Academic Integrity Statement:

"Salem State University assumes that all students come to the University with serious educational intent and expects them to be mature, responsible individuals who will exhibit high standards of honesty and personal conduct in their academic life. All forms of academic dishonesty are considered to be serious offences against the University community. The University will apply sanctions when student conduct interferes with the University primary responsibility of ensuring its educational objectives." Consult the University catalog for further details on Academic Integrity Regulations and, in particular, the University definition of academic dishonesty.

The Academic Integrity Policy and Regulations can be found in the University Catalog and on the University website (http://catalog.salemstate.edu/content.php?catoid=13&navoid=1295#Academic_Integrity). The formal regulations are extensive and detailed - familiarize yourself with them if you have not previously done so. A concise summary of and direct quote from the regulations: "Materials (written or otherwise) submitted to fulfill academic requirements must represent a student's own efforts". *Submission of other's work as one's own without proper attribution is in direct violation of the University's Policy and will be dealt with according to the University's formal Procedures. Copying without attribution is considered cheating in an academic environment - simply put, **do not do it!***

University-Declared Critical Emergency Statement:

In the event of a university-declared emergency, Salem State University reserves the right to alter this course plan. Students should refer to www.salemstate.edu for further information and updates. The course attendance policy stays in effect until there is a university-declared critical emergency.

In the event of an emergency, please refer to the alternative educational plans for this course, which will be distributed via

standing class communication protocols. Students should review the plans and act accordingly. Any required material that may be necessary will have been previously distributed to students electronically or will be made available as needed via email and/or Internet access.

Equal Access Statement:

"Salem State University is committed to providing equal access to the educational experience for all students in compliance with Section 504 of The Rehabilitation Act and The Americans with Disabilities Act and to providing all reasonable academic accommodations, aids and adjustments. **Any student who has a documented disability requiring an accommodation, aid or adjustment should speak with the instructor immediately.** Students with Disabilities who have not previously done so should provide documentation to and schedule an appointment with the Office for Students with Disabilities and obtain appropriate services."

Note: This syllabus represents the intended structure of the course for the semester. If changes are necessary, students will be notified in writing and via email.
